

### What is Best Value?

The Best Value program is a unique web-based initiative that provides cost saving opportunities for your lab and the University of Pittsburgh. Best Value items have been price optimized for Pitt to help extend research funding. The program offers money-saving alternative products (Best Value items) for the products you are buying every day. When performing a search on the Fisher Scientific punchout site, look for the Best Value symbol  for cost-saving alternatives!

### How it Works!

1. Perform a search using a search term or part number in the Fisher Scientific Punchout catalog.
2. Review the punchout results and where available, the alternate Best Value product will appear on the same page.
3. The Best Value item will be indicated with the  icon.

**Compare Selected Products**

To compare, click the Quick View button on the search result. Then, select the check box next to the item you'd like to compare.
