# Working with a Shopper's Orders

---

## Section Objectives

At the end of this section, you should be able to:

- View a Shopper's orders
- Assign an account number to an order
- Approve a Shopper's order
- Reject a Shopper's order
- View PR History

# The Shopper Role

---

A Shopper is another role in the PantherExpress application.

- While a Shopper can search for items and add them to a shopping cart, a Shopper cannot enter account number information into the order.
- A Shopper cannot submit an order directly to a supplier.
- Once a Shopper submits an order, it is reviewed by a Department Buyer (Account Assigner). The Buyer enters the account number information and submits the order for approval.
- The Shopper role can be very helpful in high volume purchasing areas, and also when orders are complex, and the department buyer might not be familiar with the items needed.
- The Shopper role is typically popular in areas that do scientific buying.
- Department Buyers have the ability to reject a Shopper's order.
