Panther Express User Interface Comparison

In the Classic user interface, navigation is performed by clicking on tab-driven navigation menus and sub-menus that are always present on the screen. In the new interface, tab navigation has been replaced by a clean, slide-out side menu that displays the available menu options.

**Classic**

- The Classic interface is navigated via a tab-driven menu that is always present across the top of the page. Sub-menu items located in sub-navigation tabs.

![Classic Interface](image1.png)

**New**

- The New interface features a slide-out menu. Menu items stay out of the way until they are needed for a cleaner, less cluttered site.

![New Interface](image2.png)
In the Classic interface, related menu options are often located in separate menu tabs. In the New interface, the menu has been reorganized in a more logical manner to make locating pages easier. A brand new feature in the New interface is a Menu Search option to help find pages that are not frequently used.

**Classic**

- Classic interface often separates related pages on to separate tabs. For example, the shopping page, favorites page and forms page are located in individual tabs.

**New**

- Menu options are grouped by related tasks, making them easier to locate. Examples of grouped menu options include shopping tasks (shown below), administrator tasks, tasks related to documents and approvals, and more.

- Pages are easier to find with a Menu Search option. A keyword search returns a list of pages containing that keyword. Search results are clickable to take you directly to the page. Breadcrumbs display that tell you how to navigate to the page. Note: You can also use the Alt + M quick-key to access Menu Search.

Panther Express User Interface Comparison

In the Classic interface, action items are located on the shopping page. If you are in another area of the application, you are required to return to that page to view them. In the New interface, action items are located in the top banner area, making them accessible from anywhere in the application.

**Classic**

- Action items are located on the shopping page.

**New**

- Action items are located in the top banner making them accessible from all areas of the site.

- As with Classic interface, clicking on the action item takes you to the appropriate area of the application to complete the action.
