Selecting a PC or Laptop for your Department

The University believes that the Computing Consolidation Initiative and Dell computer recommendations [shown here](#) (and available through Dell's catalog on the PantherExpress System) will provide a cost-effective best fit for most of the University's computing needs. However, we recognize that in some cases the standardized configurations, or Dell computers in general, may not be the right fit for specific or unique departmental computing needs.

If you have determined that your departmental computer requirements are best met either by a computer not shown on the [classification matrix](#) or by a non-Dell product, then please contact PantherExpress Customer Service for guidance by submitting an [online inquiry](#) or by calling 412-624-3578.

Personal PC or Laptop Purchases

Use this [link](#) to place *personal* purchases and take advantage of Dell's Personal Purchase Discounts.
