POLICY STATEMENT

Accurate, complete, and timely accounting and financial reporting relies on departments reviewing, reconciling, and adjusting their Level Reports in a timely manner by an individual knowledgeable of the account.

Transactions detailed in the Level Reports should be reviewed for accuracy and reasonableness and should be reconciled to source documents as well as subledgers or subsystems.

Revenues and expenses should be matched so that the expenses that give rise to the revenues are recorded in the same account and in the same accounting period.

Adjustments made to properly record financial accounting transactions are to be completed in a timely manner for financial and governmental accounting and reporting purposes.

Segregation of the authorization, posting, and reconciliation functions should be established where possible. At a minimum, the reconciliation should be reviewed and approved by someone independent of the posting and processing of transactions.

REASON FOR POLICY

To communicate responsibilities for the review and reconciliation of Level Reports and the timely processing of any required adjustments or correcting entries.

DEFINITIONS
